

Administrative Committee

March 2, 2015

Present: Ellington, Robkin, Alt

Absent: none

Also Present: Mayor Palm, Cheryl Giese, Chief Schauf

The meeting was called to order by Ald. Robkin at noon, noting compliance with the Open Meetings law.

Moved by Ellington, seconded by Alt and carried to approve the minutes of February 2, 2015. Motion by Alt, seconded by Ellington to approve the agenda and carried unanimously.

Airport Operations: Giese gave a report of airport activities for the last month, highlighting activities of tree removal and trimming. The next pavement project will be the runway reconstruction shown on the 6 year plan for design in 2015, studies in 2016 and reconstruction in 2017. Current estimates for the work is \$3M with 95% being paid by state and federal grants. The State is in the process of putting together their federal budget request and may include our project, depending upon competition from other airports and the total financial requests of all Wisconsin airports. The local airport patrons have asked for the runway to be widened from 75' to 100' to improve safety since there is only one paved runway. We will hear from the State in early May as to whether our project is funded or not.

Airport Improvements Petition: The current petition for pavement work at the airport expires later this year so the runway work needs to be requested by petitioning the state for the funding. Moved by Ellington, seconded by Alt and carried unanimously to recommend that the Council petition the State for the runway project design, studies, reconstruction and any related work.

Next meeting is to be held April 6, 2015 at 12 p.m.

Moved by Alt, seconded by Ellington and carried to adjourn.

Cheryl Giese,
Clerk-Finance Director

City of Baraboo Clerk's Department
135 4th Street

To: Administrative Committee
From: Cheryl M. Giese, City Clerk-Finance Director
Date: April 2, 2015 for meeting of April 6, 2015
Re: Report on Airport Activities

Growth and Development Activities: program needs and planning efforts, grant funding, current and future development of facilities, advertising and promotion.

- Tree Trimming/Obstruction Clearing Project. We were expecting the night minimums and the descent approaches to be published on April 2 which I reported at the last meeting. However, upon checking this morning, the approaches were not updated. We are looking into why they were not published and will report at the meeting.
- Traeger Tree. Eminent domain proceedings were initiated and Mr. Trager did not respond in a timely manner to the jurisdictional offer. The tree was removed on April 1st after objections by Mr. Trager who called the Sheriff's department attempting to delay the cutting or negotiate a different deal. Now that the tree is removed, I will contact the FAA and DOT to advise them that the obstruction has been removed.
- 2014 Paving Project. No update. The hangar road pavement project was substantially completed in November. The project is held open until the spring to determine if there is any winter damages that need to be repaired. This was another successful project at our airport and came in about \$10,000 under budget overall.
- Property Acquisition. No update. MSA Professional Services has been contracted by the Bureau of Aeronautics to acquire the Coolidge property north of the airport. From what we understand, the timeline to closing will stretch to the fall of 2015. Most recent communications involved creating an easement for the well and shared driveway which Attorney Reitz is reviewing for the Bureau.
- Runway Reconstruction Planning. No update. The 6 year capital plan for the Airport calls for design of the runway reconstruction in 2015, any required studies including wildlife, archeological, feasibility or master plan work in 2016 and construction in 2017. The project would consist of reconstructing the mile of paved runway, replacement of the runway lighting on both sides of the runway and possible storm water drainage if necessary. Current estimates for the work is approximately \$3 million and State and Federal grants are expected to pay for 95% of the work with the remaining 5% being paid locally.

A project of this magnitude requires significant pre-planning for several reasons. First, the monetary size is greater than the normal annual allotment for our airport and second, because the airport will be closed for most of one summer while the runway is reconstructed.

I have contacted Mary Strait from the Bureau of Aeronautics concerning financial planning for this project. She is currently preparing the State's federal budget request and our project is in competition with needs from all of the other airports in the State. Her task is to put together a budget request that the FAA will approve which means she and others from the BOA prioritize Wisconsin airports needs. Criteria that influences her decision is condition of the existing runway, safety improvement components and local funding match.

The local airport patrons have asked for a wider runway. Currently the runway is 75' wide and they are suggesting 100' to improve safety. We only have one paved runway and wind direction can impact ability to hold aircraft in the flight path, therefore a wider paved surface improves ability for safer landings and take offs in inclement conditions. Widening of the runway is not eligible for federal and state funding. The estimated cost of the widening is \$850,000 and would need to be paid locally.

The State's federal budget request is submitted in the next few weeks and an answer is expected in late April/early May. At this point, I have asked to be included for the design work in 2015 which is approximately \$150,000 or one year of entitlement funds. Having the design completed will advise us of the actual scope of the project, including identifying what studies will be required and get us closer to an actual project cost.

We will plan for a meeting in early May with representatives from the Bureau of Aeronautics for the next phase of project planning. In the meantime, we will meet with the airport owners to keep them informed of the project and seek local support from airport patrons.

The City also needs to petition the State for the project since our current petition expires later this year and this item will appear on future Council agendas for action.

Policies and Enforcement: Promote/regulate safe and efficient use of airport including airshow and events, policy enforcement, enforcement of Rules and Regulations, collect fees and revenues, uphold Owner Assurances given to Bureau and FAA policy development.

- Semi-annual invoices. Invoices were mailed in January and the second half is due in June.

Operations and Maintenance: Purchase small equipment, budget administration and monthly reporting, coordinate with On-site maintenance provider.

- Monthly budget report is attached.

Community Relations: Reports to Owners, liaison between owner and airport users, attend aviation conferences, develop and maintain website.

- No activities this month.
